

REPUBLIC of TURKEY
USKUDAR UNIVERSITY
FACULTY of HEALTH SCIENCES
MIDWIFERY DEPARTMENT
COURSE CONTENTS

YEAR ONE (FALL)

MW101 – Introduction of Midwifery

(2+0+0) 2 AKTS: 4

In this course, philosophy and basic concepts of midwifery, history, professional criterions and midwifery, midwifery education, ethical code, working areas, legal dimension, roles and responsibilities, midwifery organisations, values in community, contributions for community health are included.

MW103– Biochemistry

(2+0+0) 2 ECTS: 3

The course structure of various molecules, their chemical reactions in the organism, the biochemical processes of the human body and carbohydrates, amino acids, nucleic acid and lipid metabolism regulating the basic ways subjects are included.

MW143– Applied Basic Anatomy

(2+2+0)3, ECTS:5

Anatomy is the science that identifies body structures. In this course gross structure, organization, and function of the human body will be thought at a level that will be enough to be a health Professional. In practical sessions students will have the opportunity to examine models of the human body.

MW107 – Histology -Embriyoloj

(2+0+0) 2 ECTS: 3

In this course, the common structural features of different cell types in the human; the cell membrane, nucleus, histological features of the cytoplasm and organelles, nucleus and infrastructures, dividing variations and differences, their importance for human life activities, characteristics of the human structure and functional characteristics of the formation process of the embryo as well as different methods of investigation, in body tissues and organs include the subject.

FHS128-Basic Physiology

(3+0+0)3 ECTS:5

In this course, cell, nervous system, sensory system, muscle physiology, blood physiology, circulatory system, respiratory system, gastrointestinal system, urinary system, endocrine system, reproductive system

ATA101 – Atatürk's Principles and History of Turkish Revolution-I

(2+0+0) 2 ECTS: 3

The basic concepts, Reasons for the collapse of the Ottoman State, Modernization movements in Turkey, First World War, National Independence War.

ING101 – English-I

(3+0+0) 3 ECTS: 3

This is an elementary English course designed for beginners of English language. The learners are expected to develop four basic language skills; listening, speaking, reading and writing through various kinds of teaching techniques and practices. The learners are exposed to basic language structures and vocabulary with the help of authentic materials within real life context.

TURK101 – Turkish Language-I

(2+0+0) 2 ECTS: 3

The course will help students to gain consciousness of language; inclination and habit of reading; proper usage of fundamental spelling and punctuation; and to gain a larger vocabulary set utilization.

YEAR ONE (SPRING)

MW102 – Basic Principles and Practices in Midwifery

(3+8+0) 7 ECTS: 11

This course includes the functional health patterns model which contain safety pattern (protection from infections, asepsis, antisepsis, disinfection, sterilisation concepts and implementations, hygiene, assessment of vital signs, medication and fluid applications), role-relation pattern (importance and strategies for effective communication, the effect of patient role and hospitalisation, principles of admission and discharge to hospital), nutrition pattern (principles of nutrition, enteral-parenteral nutrition, protection of skin and mucosa integrity, prevention and care of pressure sores), elimination pattern (urinary catheterization and enema), activity and exercise pattern (body mechanics, positioning, moving, turning and ambulation of patients, respiration supportive applications, comfort pattern (support of sleep and rest, coping strategies with pain), coping and stress tolerance pattern, Self-perception pattern (adaptation to body image changing in pregnancy)

FHS134–Microbiology

(2+0+0) 2 ECTS: 2

This course aims to give brief information about microbiology. Course objectives are to inform students about microorganisms and introduction to basic microbiology concepts. This course includes introduction to microbiology; microbial metabolism and growth; viruses; bacteria; fungi; protozoans; interactions with microorganisms; immunology and diagnostic microbiology; epidemiology.

BES259 – General Nutrition

(2+0+0) 2 ECTS: 2

Definition and importance of nutrition, nutrients and functions, nutrition in special situation (pregnancy-lactating women, infant nutrition, preschool and school children nutrition, adolescent nutrition, elderly nutrition etc.)

ATA102 – Atatürk's Principles and History of Turkish Revolution-II

(2+0+0) 2 ECTS: 3

To criticize the reasons of the Ottoman collapse, Balkan Wars, WWI, dynamics of the National Struggle. To get students to explain well the concepts like revolution and reform. Additionally to summarize political developments in completed phase of Turkish Revolution and establishment process of new state, Atatürk Revolutions in the political and social fields. The course includes events in the genesis and development of modern Turkey, ideas and principles; Turkish foreign policy in Atatürk Era, Atatürk's revolutions, the basic principles of Turkish Revolution.

ING102 – English-II

(3+0+0) 3 ECTS: 3

This is an elementary English course designed for beginners of English language. The learners are expected to develop four basic language skills; listening, speaking, reading and writing through various kinds of teaching techniques and practices. The learners are exposed to basic language structures and vocabulary with the help of authentic materials within real life context.

TURK102 – Turkish Language-II

(2+0+0) 2 ECTS: 3

The course will help students to gain consciousness of language; inclination and habit of reading; proper usage of fundamental spelling and punctuation; and to gain a larger vocabulary set utilization.

YEAR TWO (FALL)

MW201 –HealthyPregnancy and Midwifery Care

(3+2+8)8 ECTS: 13

To provide the midwifery student with knowledge and skills about pregnancy formation, changes in pregnancy, risks, healthy start for healthy generation, healthy pregnancy, birth and postnatal care, and the importance of monitoring and care, and to reflect the learned information to practice. This course includes normal pregnancy process.

MW203- Teaching in Midwifery

(2+0+0)2 ECTS:2

This course includes the education, teaching concepts, educational fields, theories, process, the importance of education in midwifery, the role of midwives, the principles of health education of person-family and community, to write the educational targets, educational methods and instruments, clinical education, continuing education ect. topics

MW 205-Health Assessment

(2+0+2) 2 ECTS: 2

This course contains the data collection methods such as interview, observation and physical assessment, and data collection by using Functional Health Patterns model, diagnosis of the problems by analysing the collected data.

MW207-Internal Diseases and Care

(2+0+4) 4 ECTS: 6

This course student will gain basic care knowledge and skills with physiopathology, risk factors, prevention principles, medical diagnosis and treatment of acute and chronic diseases that may be present in the past. Diseases affecting adults include care and coping with the illness of the patient.

FHS202 – Pharmacology

(2+0+0) 2 ECTS: 2

To teach basic principles in pharmacology and toxicology. Also enable to learn the pharmacokinetic and pharmacodynamic properties of drugs acting on the organ system and the side effects of these drugs. Basic concepts in pharmacology and toxicology, pharmacological properties and side effects of the drug acting tissue and organ systems

FHS135– Pathology

(2+0+0) 2 ECTS: 2

This course; function of pathology & cytopathology, cellular response to stress, cell injury and death, acute & chronic inflammation, tissue repair and wound healing, hemodynamic disorders, thromboembolic diseases, infarction, shock, immune system diseases, cell growth and differentiation disorders, neoplasia, infectious diseases, environmental and nutrition-related diseases.

YEAR TWO (SPRING)

MW202- Risky Pregnancies and Midwifery Care

(3+2+6) 7 ECTS: 13

This course is student; understanding the importance of maternal and fetal health gain knowledge and attitudes necessary to determine the risky situations related to pregnancy in the mother and to be able to carry out care and applications related to these situations. This course contains risky situations and evaluations related to pregnancy and fetus health

MW204 – Surgical Diseases and Care

(2+0+4) 4 ECTS: 6

This course will provide students with the basic principles of surgery, diseases, pre-operative, sequential and postoperative care principles to gain knowledge and application skills. This course covers the care of the patient who will have infection prevention and control, wound care, shock patient care, perioperative care, GI, liver and biliary tract, breast, respiratory, circulatory, endocrine system surgery.

MW206 –Sexuality, Reproductive Health and Family Planning

(2+0+2)3ECTS: 4

This course; sexual and reproductive health in the world and Turkey, evaluation applicant, communication, consulting, contraceptive methods, contraception in special cases, infertility, forms and records used in family planning services, sexual health education, sexually transmitted diseases, sexual contains abuse issues.

MW208– Emergency care

(2+0) 2 ECTS: 2

This course includes first aid and emergency aid concepts basic first aid skills and knowledge teaching basic life support application.

YEAR THREE (FALL)

MW315 – Obstetric and Obstetric Care

(3+2+8) 8 ECTS: 13

This course is for students; Physiology of normal birth, stages, birth of the body answer, birth pain, give information about mother's birth preparation, first, second and third childbirth follow-up, mother and baby evaluation and follow-up, early postpartum period breastfeeding initiation, episiotomy, care of mother during postpartum period to gain skills about. Providing care for mother and baby during the birth process.

MW303-Newborn Care**(2+0+4)4 ECTS:6**

In this course, the characteristics of healthy and risky newborns, basic care practices, common problems in newborns, parent baby interaction and discharge of newborn are included.

MW305–Child Health and Diseases**(2+0+4) 4ECTS: 6**

This course contains the basic philosophies of child and family, child health status and factors affecting child health, children's perceptions of illness and responses to be ill, effects of acute and chronic diseases on child and family, common child health problems and diseases and approaches to care for them.

FHS127- Infection Diseases**(2+0+0) 2 ECTS: 2**

This course includes common infectious diseases, immune system and vaccines and hospital infections in children.

MW311- Care in Women Mental Health and Diseases**(2+0+0) 2 ECTS: 2**

This course includes some issues such as the protection of mental health, conceptual information for assessment, maintaining, treatment and care of pregnant women with psychiatric problems, support of women and family in unwanted pregnancies, abortion, newborn lost.

FHS201- Research Methods in Health Sciences**(2+0) 2 ECTS: 3**

This course includes the importance of research in midwifery, research process, qualitative and quantitative research methods and characteristics of them, critically analysis of research report samples and research ethics.

YEAR THREE (SPRING)**MW314- High Risk Birth and Postnatal Care****(3+2+8)8 AKTS:13**

Students are asked about the risky situations during the birth, mother and baby danger, preparation of mother's birth, appropriate initiative, information about the risks of preterm and postterm labor in the postnatal period and skills. Risk births and midwifery initiatives.

MW304-Obstetrics and Gynecology**(2+0+4) 4 ECTS: 6**

This course focuses on women's health services in the direction of primary health services development, identification of risk situations that disrupt women's health, to be able to make early diagnose and care in deviation situations, to be treated as a whole within the society in which she lives, to provide knowledge and skills that will enable them to assume responsibility for maintenance a theoretical and practical essay.

MW306- Community Health Services**(3+0+4)5 ECTS:7**

This course includes prenatal, postnatal and postnatal the protection of the physical, mental and social health of the mother and the newborn, basic health services for midwifery services necessary for the development and maintenance of services approach and gain information about this subject It aims.

MW308- History of Midwifery and Ethics**(2+0+0)2 ECTS:2**

The aim of this course is; the work of the midwifery learning the steps, basic principles of deontology, characteristics, responsibilities and responsibilities of the duties, occupational identity and the adoption of professional morality. This course focuses job description and characteristics definition of midwifery professional law and responsibilities.

MW312 – Management in Midwifery

(2+0+0)2 ECTS: 2

Skills and knowledge acquired in matters related to midwifery services management to be implemented. This course focuses basic concepts and theories in management management organization of health services effective midwifery management principles.

YEAR FOUR (FALL)

MW415– Research Skills in Midwifery I

(1+0+0)1 ECTS: 2

Course overview, Explanation of goals, Research planning, roles in the making of scientific research in midwifery, responsibilities, Handicaps and remedies

MW403 – Elective Integrated Clinical Practise (Internship Program)I

(4+0+24) 16 ECTS: 28

This course is determined by the department (mandatory) and student interest in the (elective) internship program carried out in certain clinical applications, students over four years learning the knowledge and skills to reinforce their application.

YEAR FOUR (SPRING)

MW402 – Research Proficiency in Midwifery II

(2+0+0) 2 ECTS: 2

This course covers topics such as the ability to use all aspects of students to conduct research on new topics or on a different one of the issues they see during the course of undergraduate education and the research process.

MW403 – Departmental Elective Course (Internship Program)I

(4+0+24)16 ECTS: 28

The aim of this course is to teach birth preparation philosophy and techniques. Birth preparation philosophy and techniques.

YEAR FOUR (FALL)

MW416– Research Skills in Midwifery II

(1+0+0)1 ECTS: 2

To contribute to the cultivation of mothers with the qualifications of midwives who can research, understand and evaluate scientific researches, investigate modern midwifery processes, investigate, observe, monitor and evaluate opportunities that enable the use of research information

MW404 – Departmental Elective Course (Internship Program)II (4+0+24)16 ECTS: 28

Pregnancy training, assessment of maternal health during pregnancy, evaluation of fetal health during pregnancy, monitoring of mother and fetus health during labor, normal birth management; factors affecting the birth process, birth stages, systematic responses to the birth of the mother organism, birth pain, theories of pain, physiology of pain, pain affecting factors, assisting the mother to handle the pain, preparing and evaluating the birth of the mother, monitoring the mother and baby at the birth, risky conditions for mother and fetus at birth.

DEPARTMENT ELECTIVE COURSE

MW230- Sociology of Health (2+0+0) 2 ECTS: 2

This course includes the basic concepts of the health sociology, health-disease system, health and society, health and culture, socio-cultural structure of the health-disease relationships, social attitudes related to health care, health professionals.

MW237-Professional English (2+0+0)2 ECTS:3

The content of the course is such as translation rules from Turkish to English, examples of translation (academic), examples of translation (medical), studies of technical vocabulary, preparation of seminar, preparation of academic publication, preparation of official letter, preparation of cv.

MW232-Professional English (2+0+0)2 ECTS:2

The content of the course is such as translation rules from Turkish to English, examples of translation (academic), examples of translation (medical), studies of technical vocabulary, preparation of seminar, preparation of academic publication, preparation of official letter, preparation of cv.

MW233-Professional English (2+0+0)2 ECTS:2

The content of the course is such as translation rules from Turkish to English, examples of translation (academic), examples of translation (medical), studies of technical vocabulary, preparation of seminar, preparation of academic publication, preparation of official letter, preparation of cv.

MW234-Professional English (2+0+0)2 ECTS:2

The content of the course is such as translation rules from Turkish to English, examples of translation (academic), examples of translation (medical), studies of technical vocabulary, preparation of seminar,

preparation of academic publication, preparation of official letter, preparation of cv.

MW236- Place of Women and Violence Against Women in Society (2+0+0)2 ECTS:3

This course includes topics such as the position of woman in society, causes and effects of gender discrimination, causes and effects of violence against the woman, the rights of woman, initiative for protection of woman rights and responsibilities of midwives all of these issues.

MW235- Sexual Health Education (2+0+0)2 ECTS:2

This course; sexual health information education, socioeconomic view, value creation, sexual identity development, somatic changes in adolescence, mental changes in adolescence, reproductive health, decision making process and safe behavior, adolescent harmful habits, admission centers, happy and safe sexuality, AIDS, rights, sexuality and violence, sexual health education practices.

MW310– Home Health Care Services (2+0+0) 2 ECTS: 2

In this course, description and history of the home care, home care team, roles and responsibilities of home care midwives, following up, educating and care of pregnant, puerperant women, newborn baby and their family at home are thought to students

MW320 – Gynecologic Oncology (2+0) 2 ECTS: 2

This course includes some information about classification, etiologic factors, signs and symptoms, diagnosis, treatment and care of gynecological cancers

MW321–Biostatistics (2+0+0) 2 ECTS: 2

This course includes the selection of research problems, collection of data, preparation of statistical evaluation, data analysis methods, selection and interpretation of appropriate parametric and nonparametric descriptive tests, characteristics of different research methods, qualitative and quantitative research methods, ethical issues and research design, critical evaluation of research

MW322- Growth-Development (2+0+0) 2 ECTS: 2

This course includes definition of growth-development, factors affecting growth, developmental stages and basic characteristics of individuals in these periods, basic characteristics of developmental theorists and theories, growth measures and factors affecting growth-development and growth-promoting approaches.

MW323- Transcultural Midwifery (2+0+0) 2 ECTS: 2

This course includes the concept and definitions of culture, cultural elements (traditions, cultural structures, attitudes, prejudices and discrimination), the place and importance of culture in health, the concept of health and disease and its relationship with culture, socio-cultural factors affecting health, intercultural (transcultural) concept, intercultural communication (values, beliefs), intercultural health approaches, use of models in intercultural care and health care models based on culture, global health problems, cultural impact of migration and migration. cultural applications affecting women's health and midwifery

approaches, midwifery in turkish culture and turkish culture; cultural practices in prenatal, postnatal and postnatal and child care, midwifery in Turkish culture and Turkish culture.

MW405– Forensic Midwifery

(2+0+0) 2 ECTS:2

This course includes some information about how to use midwifery knowledges and skills in judicial issues and how to behave encountered to the legal problems

MW408- Adolescent Care

(2+0+0) 2 ECTS:2

This course is focused on physical and psiko-social developmental charecteristics of adolescent and effects of pregnancy and labor on adolescent health.

MW409 – Family Dynamics

(2+0)2 ECTS:2

This course includes the family structures anf functions, family relations and affecting factors, and supportif aproaches for solution of family conflict and problems

MW410-Sign Language

(2+0+0)2 ECTS:2

It is aimed to teach and teach the sign language used by the hearing impaired individuals and to give them the ability to use this language when necessary in daily life.

MW411-Pregnancy Training

(2+0+0)2 ECTS:2

This course includes; gynecologic, physical, emotional, social factors affecting pregnancy, nutrition in pregnancy, hygiene, activity, sexuality, birth preparation.

MW412- Marriage Counseling

(2+0+0)2 ECTS:2

This course includes information on the concept of family and family counseling, characteristics of family counseling, process and principles.

MW413- Natural and Alternative Delivery Methods

(2+0+0)2 ECTS:2

This course includes normal vaginal birth as well as alternative birth methods such as water birth and their tasks in these methods.

MW414-Anthropology

(2+0+2)2 ECTS:2

This course includes, midwifery and anthropology relation, midwifery and social theories, eco social environment, social anthropology, health-disease concept in terms of sociology, health politics will be done in our country.

FIELD ELECTIVE COURSES

SOH307-Social Work With Families And Children

(3+0)3 ECTS:5

This course includes social service intervention to strengthen the family, planned change process in the family; the characteristics of childhood and adolescence, the needs and problems of children, the examination of economic, social and psychological problems related to neglect-abuse of children, the positive changes of social services with children and their families
