basic statistics tests will be the main content of the course, moreover, in order to understand how statistics is used in academic articles (especially related with psychology), academic article presentations will be performed and they will be seminized with the students.

PSY 211 Biological Basics of Psychology: (3+0)3 ECTS:5

This course aims to analyze biological basics of psychology in terms of genetics, anatomic and neurobiological approaches.

SECOND YEAR

IV. Semester

PSY 202 Psychology of Learning: (3+0)3 ECTS: 5

Familiarizes the student with the general principles of learning and memory by examining various learning theories, memory research, perception, information processing and problemsolving. Conditioning, trial and error, insight learning, acquisition and forgetting, transfer of training, and behavior modification are the key topics of the course. The course provides a survey of learning science and theory in addition to the practical applications of human learning and teaching.

PSY 204 Health Psychology: (3+0)3 ECTS: 5

The aim of this course is to gain awareness and biopsychosocial perspective about the concepts of health, disease and the relationship between treatment and psychological factors.

PSY 206 Brain and Behaviour:(3+0)3 ECTS: 5

Nervous system which is top control center that manages our behaviour will be analyzed functionally. In this course, neurological basis of normal and pathological behaviours will be discussed. Functional anatomy of central neural system, functional brain circuits, sensation-perception-behavior network will be analyzed and the basis of neural mechanisms underlying our daily behavior will be discussed.

PSY 230 Developmental Psychology II: (3+0)3 ECTS: 5

This course, as a continuation of PSY 229, continues to introduce the main theories and concepts of developmental psychology. The course covers physical, cognitive, and social-emotional development during adolescence and adulthood.

PSY 234 Applied Statistics*: (2+2)3 ECTS: 5

This is a course aiming to teach basic statistics in psychology. In addition to learning about the basics of conducting psychological data analysis and hypothesis testing,

students will learn about the following statistical tests: t test, ANOVA and nonparametric tests. Student's task will be to learn the basic concepts behind these tests, as well as to be able to compute the tests by hand. Student will also learn how to run these tests in SPSS.

PSY 212 Personality Theories: (3+0)3 ECTS:5

Introduces personality theories and the important factors in the development of personality from birth to maturity. Explores the major theories of personality as well as empirical studies on personality development, personality functioning, and psychopathology.

THIRD YEAR

V. Semester

PSY 303 Clinical Psychology- I: (3+0)3 ECTS: 5

Overviews basic issues, methods, and research professional issues, psychological assessment, and approaches to psychotherapy and behavioral change, provides an understanding of procedures for psychological assessment, intervention, and research with clinical populations.

PSY 305 Psychotherapeutic Approaches: (3+0)2 ECTS: 3

Introduction to basis of psychotherapeutic interview methods and teaching the skills that needed for practice of these skills. Regulation of context, focus and duration of the therapy, determining the limits of therapy and intervention, and structuring the questions and content are included.

PSY307 Psychopathology: (3+0)3 ECTS: 5:

Explores historical views and current perspectives of abnormal behavior. Examines the major approaches to the study of abnormal behavior, including a survey of the major categories of disorder according to DSM-IV. Also An introduction to the theoretical approaches and empirical research in psychology used to define, assess, categorize, prevent and treat psychological disorders.

THIRD YEAR

VI. Semester

PSY 318 Clinical Psychology –II*: (0+6)3 ECTS: 5

The purpose of this course is to help students have a general knowledge about the clinical psychology. Promotion of academic and clinical work in the field of clinical psychology. To discuss the ethical issues related to the profession and the comparison of clinical psychology.

PSY 308 Psychotherapeutic Interview Techniques: (3+0)3 ECTS: 5

Introduction to basis of psychotherapeutic interview methods and teaching the skills that needed for practice of these skills. Regulation of context, focus and duration of the therapy, determining the limits of therapy and intervention, and structuring the questions and content are included.

PSY 306 Neuropsychology: (3+0)3 ECTS: 5

Explaining the interaction of the Neuroscience and the Psychology with historical development; introduction to structure and function of neurosystem; examining the effects of neurosystem and brain, structure of and distortion on these systems on human behavior.

FOURTH YEAR

VII. Semester

PSY 403 Measurement and Assessment in Psychology*: (3+2)4 ECTS:5

Basic concepts of psychological measurement tools, development and application of tests, measurement and evaluation methods will be explained.

PSY 407 Experimental Psychology: (3+0)3 ECTS:5

The goal of the course is to introduce students to experimental psychology.

Experimental psychology is a methodology rather than being an area of psychology and it covers all areas of psychology that use the experimental method.

FOURTH YEAR

VIII. Semester

PSY 406 Ethics in Psychology: (3+0)3 ECTS: 5

In this course, the principals and standards of theoretical psychology education (supervision and research) and clinical applications are studied. Case examples, applications and publications related to mechanisms working for ethical decisions are examined and criticized.

PSY 404 Industrial and Organisational Psychology: (3+0)3 ECTS: 5

Covers the organizational topics about industrial psychology, studies the definitions such as leadership, job satisfaction, motivation theories, goal setting, organizational behavior, organizational development, and their effects on the functioning of institutions.

ELECTIVE COURSES

V. Semester

PSY 341 Educational Psychology: (3+0)3 ECTS: 5

The course covers some basic theories and research techniques. Child development, cognitive psychology, personality, memory and the social psychology of individuals and groups.

PSY 343 Disaster and Trauma Psychology: (3+0)3 ECTS: 5

The course covers subjects of emergency behaviour and psychological trauma associated with disasters and crises. Besides, course focus on the influences and consequences of posttraumatic stress on victims, families and community members resulting from disaster and traumatic experiences.
