

MANAGEMENT OF HEALTH INSTITUTIONS PROGRAM

Instructor Language: Turkish English Preparatory Year: Optional Score Type: TYT

Health Institutions Management refers to the execution of administrative services in all kinds of public and private institutions and organizations related to the health sector. The aim of the Health Institutions Management program is to raise experts with a holistic approach within the scope of management and hospital management, to provide the training required by the equipment required to compete in the quality needed in the field of Health Institutions Management in Türkiye, to provide students with experience in Health Institutions Management with sufficient practices and to provide the necessary health legislation, insurance, financial management, health economics, entrepreneurship, purchasing and material to gain knowledge on issues such as management.

Objective

In the health sector, there is a need for human labor who has sufficient infrastructure in the fields related to the field, who can interpret and evaluate data by using the basic level knowledge and skills acquired, who can define problems and develop solution proposals, who have strong communication, who have organizational and coordination ability, who can take responsibility in teamwork, who are patient and who follow the current

information in the field. With the health institutions management program, it is aimed to bring qualified assisting staff who can meet these needs, who provide quality services with the interdisciplinary holistic approach required for the execution of administrative works in health institutions, who are economically successful and have a highly competitive management approach.

Employment Opportunities

Students who complete the program are awarded an associate degree diploma and the title of "Technician in Management of Health Institutions". Rapidly developing and increasing number of health institutions increase the need for qualified graduates in this field. For this reason, the students who graduate from this program can work in all health institutions such as laboratories, insurance companies, rehabilitation centers, pharmaceutical companies and enterprises producing medical devices, especially hospitals.

Vertical Transfer Opportunities

Graduates have the opportunity to transfer vertically to programs of Emergency and Disaster Management, Business Administration, Health Management, Social Work and International Business Management.
